

Simple, intelligent, & customer-centric

Streamline, simplify, and automate your financial operations with the leading cloud accounting application native to the Salesforce Platform.

Accounting for the future of finance

Elegant enough for a startup yet robust enough to serve the most complex, multinational organization, FinancialForce Accounting automates your entire opportunity-to-cash process, helps you manage revenue precisely, and delivers the flexibility you need to take on new business models and thrive in the new services economy. Plus it's easy to implement, straightforward to learn, and trouble-free to maintain.

"We can spin up new products, tack on new revenue streams, expand into new geographies—the platform scales with us."

NNN\ NewVoiceMedia

360° view of financial health

Get comprehensive customer reporting, spanning conversations and transactions in billing, accounts receivable (AR), sales, and services. Know everything you need to serve and delight customers.

Master customer record

Eliminate the costs and risks of synchronizing transactions and master data across different systems. Share workflows and approval processes, use common reporting and analytics tools, and break down walls between departments.

Opportunity-to-renewal

Automate the billing and collections process from the time an opportunity closes to payment, renewal, and revenue recognition. Keep days sales outstanding (DSOs) low and cash flow strong.

Limitless revenue models

Extensible and configurable, our app manages multiple revenue streams so you can add new lines of business, move into new markets, and expand overseas while staying in complete control.

Seamless decision-making

Get 100% real-time financial analysis and modeling, so you can make real-time decisions anywhere, anytime. Also, take advantage of our advanced analytics and reporting powered by Einstein.

FINANCIAL REPORTING

More than just financial statements — it's real-time financial analysis and modeling with day-to-day operational reporting and trackable KPIs. Get deeper, richer analysis and make smarter decisions.

- · View critical info, data and analysis from mobile
- · Analyze your data your way
- Choose from dozens of financial statement templates or create your own

GENERAL LEDGER

Built to handle the most diverse business requirements while streamlining the most tedious, time-consuming tasks, including automated reversing of entries and recurring journal entries.

- Flexible, multi-dimensional chart of accounts
- Multi-currency, multi-company transactions
- Inter-company journals to transfer costs between companies or business units
- · Allocate costs quickly with your own templates

RECEIVABLES & COLLECTIONS

Using the same customer record as Salesforce CRM, cash processing is organized and accurate, keeping you, your sales teams, and your customers on the same page.

- Create invoices accurately the first time and post to AR instantly
- See your customer's credit standing and targeted collection tasks
- View sales and service activities in a single place
- Automatically calculate due dates and settlement discounts

CONSOLIDATIONS

Measure your firm's financial health across its entire portfolio. Handle transactions, reporting and reconciliations from multiple companies in multiple currencies — effectively and painlessly.

- Perform inter-company transactions
- · Leverage inter-company reconciliation engine
- Consolidate all company entity data in one report

PAYABLES & SETTLEMENT

Use your own unique workflow and processing rules to automate accounts payable processes. Configure routing pathways to match your organizational structure and control processes.

- · Capitalize on contract terms and discounts
- Never pay a vendor late or miss a payment
- Gain leverage with FinancialForce Procurement Management — add requisitioning, purchase order, and invoice matching capabilities

FIXED ASSETS MANAGEMENT

Take complete control of what you own. Know what each asset costs, where it is, and how much it's worth now. Track the entire lifecycle of your assets from procurement to disposal.

- Use Straight Line, Alternate Straight Line, Double Declining Balance, Units-of-Production, or Sum of Years Depreciation. Or create your own schedule.
- Track asset deployment including asset relationships
- Maintain warranty information
- · Attach documentation to asset history and warranties

CASH MANAGEMENT

Monitor cash inflow and outflow across multiple bank accounts. Cash balances are always accurate and ready to reconcile across any currencies you're transacting in.

- · Automate your reconciliation process
- Use dashboards to track or forecast cash
- · Access info from any device

ANALYTICS & PREDICTABILITY

With analytics powered by Salesforce Einstein, generate unparalleled forecasting, actionable insights, and comprehensive dashboards across profitability and performance. Always know the current and future financial health of your business.

- Produce high-level scorecards for revenue and EBITDA
- · Build audit trails tied to detailed transactions
- Generate predictive analytics based on patterns of customer behavior

FinancialForce is the leading cloud ERP and PSA provider for the new services economy. A key ERP solution native to the Salesforce Platform, FinancialForce unifies data across the enterprise in real-time, enabling companies to rapidly evolve their business models with customers at the center.
